

## Flexible Surface Reinforcement

Boddingtons newly introduced flexible surface reinforcement product, BodMat™, has been developed using the proven oscillated design of GrassProtecta™. This environmentally friendly, slip resistant product is easily installed on outside surfaces by pinning in place, or for indoor areas by simple surface laying.

Developed specifically for both animal and people traffic, the product can be cut to shape by the end-user to fit horseboxes, walkways, animal boarding areas and much more. Wherever a water pervious, enhanced-grip walkway access is required, Boddingtons BodMat™ product is the solution.

- Pleasant under foot walkway solution
- Significantly reduces foot traffic noise
- Can be used on contoured surfaces
- Can be used by wheelchairs and pushchairs
- Ideal for animal walking areas and horseboxes
- Critical Fall Height (CFH) tested to 1.8m - BS EN 1177

BodMat™ is available in roll form and can be used in a multitude of applications - wherever cushioned grip is required for walking.

- Allows water and liquids through
- Flexible and durable
- Can be cut to shape/size
- Manufactured from part recycled polymers
