

PE Cable Protection Covers

Heavy duty, yet lightweight polyethylene cable covers, incorporating a coloured printed polyethylene warning tape laminated to the top surface. Our cable covers should be laid over high voltage power cables or other buried services which require additional protection.

- High impact resistance, manufactured to A.S. 4702
- Rot resistant
- Lightweight, meaning low transportation and installation costs
- Provides increased protection for underground cables
- Increased protection against accidental mechanical damage
- Creates a physical barrier
- Special manufacture available

Other texts are available including fibre optic cables, gas pipelines and water pipelines.

Specially printed texts and other sizes of cable cover can be manufactured to order on request, subject to quantity.

Technical Specifications

PRODUCT TEXT/COLOUR	DIMENSIONS		MATERIAL
	WIDTHS	LENGTHS
