

INSECT MESH

Insect Mesh is a high quality extruded HDPE plastic fine screening mesh, with a fine mesh structure offering effective protection from the smallest of insects and debris. The mesh provides excellent light transmission and allows good air-flow. The fine screening mesh is rigid, so that it can be installed in panels and used as insect netting in both temporary and permanent applications

- Ideal as an Insect mesh
- Manufactured from High Density Polyethylene
- UV Stabilised and rot resistant
- Chemical resistant
- Available in Black & Green, other colours can be manufactured to order subject to order quantity
