

Manufactured using a 0.7mm AISI Grade 316 stainless steel tracer wires, laid in a sinusoidal wave pattern, and laminated between two layers of low density lead free virgin grade rot-resistant polyethylene.

- Unique wire design allows enhanced detectability and the product to stretch by over 25% before breaking.
- Top printguard layer protects the wires and the warning message.
- Corrosive resistant stainless steel wire with tensile strength of 680N/mm<sup>2</sup>.

Crimping Tools and Stainless Steel Crimps also available
